PROFILE

Proven **Web Developer** with a previous background in Neuroscience & Operations and 2+ years of experience in software development.

I transitioned into a career in tech because I wanted a role that encouraged constant growth and had an impact on the global community.

I am passionate about creating engaging user experiences and producing accessible software that is efficient.

SKILLS

HTML5, CSS3, SASS, JavaScript, React js, SQL, Rest API's, Axios, NodeJS, Express JS, SQL, Git, Wireframing, Deployment, Debugging, Testing. Relational Databases, Firebase, Agile Project Management

PROJECTS

Full Stack developer | "Victory Folio"

JAN 2022 - FEB 2022, FREELANCE

- Developed mobile-first react web app to help over 1,500 users connect and view my developer portfolio using React.js on the frontend & Node.js on the backend
- Designed and implemented responsive UI Wireframes with Figma, using modern design principles for all screen sizes

Front End Developer | "BandSite"

JUNE 2022 - JUNE 2022, BRAINSTATION

- Created responsive web apps and optimized site by adding comments feature via an API that can support over 1000+ users
- Enhanced website using Javascript to allow dynamic interaction with comment adding feature
